## Notes and Definitions

<sup>(1)</sup> **In progress:** means the implementation is being executed. Please do not include in this category those recommendations where there is only a designed project or an approved plan.

<sup>(2)</sup> **Chronological plan** is a series of steps in sequential order indicating an approximate date for the completion of the recommendation. For some recommendations this could require a year or more. If a longer timeframe is foreseen, please provide an estimate.

<sup>(3)</sup> As used here **substantial** could refer to whatever obstacle materially impeded the implementation. It refers to whatever the country believes constituted this condition, whether or not the recommendation is reported as completely implemented.

<sup>(4)</sup> This space is intended to permit a full account in cases of greater complexity or where the country believes a more detailed description would be justified or be useful to others facing similar conditions.

<sup>(5)</sup> Beyond the information already provided, this area enables the responding country to include information of any kind, which it considers essential to understanding the response to the recommendation, such as a lack of resources.
