

National Drug Control System (NDS)

What is NDS?

- A Management Information System (MIS) for national and international drug control
- NDS combines the control of narcotics, psychotropic substances and precursor chemicals in one system
- Automates range of day-to-day drug control activities (import/export permits, licensing of companies, domestic transactions, company management)

What is NDS?

- Automates compliance with drug control conventions on narcotics, psychotropic substances and precursor chemicals
- Enables exchange of data electronically on national and international levels and fosters interoperability between different systems

Background

- **Developed by UNODC**
- **Presentation at CICAD XXXIII**
- **Decision by Commission**
- **NDS in CICAD member states**

Initiative

- **CICAD-UNODC (Mexico City)**
- **NDS Central America**

Participants

- **Costa Rica**
- **El Salvador**
- **Guatemala**
- **Honduras**
- **Nicaragua**
- **Panama**

Responsibilities

- **CICAD**
 - **Server**
 - **Computers**
 - **Oracle license**

Responsibilities

- **UNODC (Mexico City)**
 - **Installation**
 - **Modifications**
 - **Training**
 - **Technical support**

Responsibilities

- **Countries**
 - **Maintain system**
 - **Internet charges**

Status

- **Server**
 - **purchased**
 - **installed**
- **Computers**
 - **purchased**
 - **delivered**
 - **installation**
 - **training**
